

B: QUALITY POLICY

Oceans-ESU Limited is an Environmental Consultancy, which specialises in the design, construction and management of reed bed technology to treat industrial, agricultural and domestic wastewater. Other activities include the investigation and remediation of contaminated land, air monitoring, ecological surveys and other environmental consultancy.

Oceans ESU Ltd is committed to achieving customer satisfaction by providing high quality environmental products and services. We aim to achieve this through the implementation of efficient quality management systems which are regularly reviewed and updated through a programme of continuous improvement.

Quality requirements are established which meet the needs and expectations of interested parties, and objectives are set and regularly reviewed to ensure these are met. The company is committed to ensuring that the quality policy and associated processes are effectively communicated, applied and understood within the organisation.

The quality policy is maintained as documented information and is available to interested parties as appropriate.
