

C: ENVIRONMENTAL POLICY

Oceans-ESU Limited is an Environmental Consultancy, which specialises in the design, construction consultancy, operation and management of reed bed technology to treat industrial, agricultural and domestic wastewater. Other activities include consultancy relating to the investigation, treatment and management of contaminated waters, soils and other materials. The Company (Oceans-ESU Limited) recognises that all its activities can have an impact on the environment and that these impacts are both local and global. Protecting and enhancing the environment by preventing pollution is an integral component of the business operations and the Company is committed to this aim.

The Company has developed an Environmental Management System and is committed to protecting the environment by monitoring and reducing environmental impacts through a programme of continual improvement.

In particular the Company undertakes:

- To comply with legal requirements relating to the environment;
- To comply with other environmental requirements including compliance obligations, site specific and client specific rules and guidelines;
- To conduct its activities in a manner that prevents or minimises harmful releases to air, land and water;
- To eliminate or minimise the use of products which are proven to have a negative environmental impact;
- To minimise waste by improved efficiency and through recovery, re-use and recycling in preference to disposal;
- To reduce the consumption of energy and raw materials;
- To ensure that all staff and sub-contractors comply with environmental requirements by maintaining effective procedures for communication, training and monitoring;
- To ensure that the environmental policy is maintained as documented information and effectively communicated to all persons who work for, or on behalf of the company and to ensure that it is available to interested parties;
